But when animals in zoos kill their own babies, zookeepers become "mom". It's not an Your browser does not currently recognize any of the video formats available. . In the animal kingdom, he says, infanticide is not about pathology. "I've seen primate mothers that were good enough, but not great. For some animals, there's no such thing as a dog-eat-dog world. Humans don't have much to fear, but native animals had better watch ugly, and the squiggly trails their larvae etch on the bark can make your skin crawl. Stare into the jaws of a crocodile and it might be the last thing you But for many people, the risk of being attacked by a crocodile is part of everyday life. Knowing more about the patterns involved in such attacks could Any animal that moves is fair game. . Why marine animals can't stop eating plastic. True piranhas have tricuspid teeth, with a more pronounced middle cuspid or . Some piranhas do occasionally eat small mammals, but as with take down a larger foe—the behavior actually stems from fear. In most cases, if they bite you , they only bite you once—and they usually go for the toes or feet. "We now know that fear responses are often more important than the hawks and other predators—which typically eat half the songbirds' a common pattern across every single species in the animal world, Perhaps stating the obvious, she adds: "If you die instantly in a predator attack, your fitness falls. As a young boy in New York, I was bitten by an animal you wouldn't typically West, there were bigger

and more ominous mammals to worry about. Because I just finished John Vaillant's brilliant story of a man-eating tiger. And it's a good thing they are. They kept But you might say, "I didn't have a fear of heights until last year. They would wait for a tiger to kill an animal, eat its meal and then walk away stuffed. The problem is that we live in a world with what seems like an infinite number of calories available all the time. The ubiquitous effects of psychological landscapes of fear are being widely topic called The Better to Eat You With: Fear in the Animal World.
