

# The Eye And The Mind: Reflections On Perception And The Problem Of Knowledge

## Locke's Theory Concerning the Origin of all our Ideas

- We get all our **SIMPLE IDEAS** from experience. Simple ideas are uniform in the following way: *"each [is] in itself uncompounded, [and] contains nothing in it but one uniform appearance, or conception in the mind, and is not distinguishable into different ideas"* (EHU 2.2.1).
- All our simple ideas come from experience, either from **SENSATION** (observation of external things through the five senses) or from **REFLECTION** (observation of the internal operations of our own minds) (EHU 2.1.2-4).
  - The mind is *passive* with respect to its simple ideas: these are simply written on it by experience.

This book is a discussion of some of the major philosophical problems centering around the topic of sense perception and the foundations of human knowledge.
